

Pipe Cleaner Bees

What you need:

1 yellow pipe cleaner, 1 black pipe cleaner, 2 tiny wiggle eyes, 1 popsicle stick, tacky glue.

What you do:

Cut both pipe cleaners in half. Now you have four 6" pipe cleaners. Place one yellow and one black pipe cleaner together and fold in half to form a "V". Place the popsicle stick inside the "V" and twist both pipe cleaners one time tightly around the stick. Place the other two pipe cleaners together and wrap them tightly around the stick, and wrapping over the top of the "V" pipe cleaners. The ends of the "V" pipe cleaners will be sticking out over the top of the popsicle stick. The black "V" pipe cleaner forms the antennae. Now fold the yellow "V" pipe cleaner down and around to form the wings. Glue the wiggle eyes to the bee's body.
